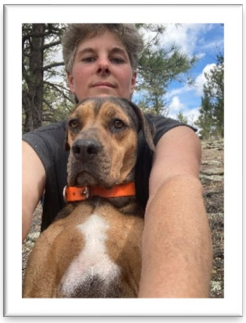
The Spanish Peaks-Purgatoire River Conservation District
Welcomes New District Conservation Technician



The Spanish Peaks-Purgatoire River Conservation District (SP-PRCD) is pleased to welcome **Randee DeCristino** as our new District Conservation Technician (DCT), made possible through the Colorado State Conservation Board (CSCB) DCT grant. Randee joined the District in May and has hit the ground running.

In this role, Randee will oversee the District's Cost Share program as well as the CSCB Matching Grant Cost Share Program, working closely alongside NRCS to bring conservation technical assistance directly to local landowners. Whether it's helping plan a project, navigating cost-share opportunities, or connecting landowners with the right resources, Randee is here to support our community's conservation efforts on the ground.

We're excited to have Randee on the team and look forward to the positive impact this partnership with NRCS will have across our district. If you're a landowner interested in conservation planning or cost-share assistance, don't hesitate to reach out — Randee is ready to help!

Fence Project Before

Fence Project After
